GM SERIES VINEYARD

- With an extensive model range in 7 widths, and side or rear discharge versions, the GM Series mowers meet most orchard/mowing requirements.
- A specially designed compact twin and 3-rotor format, with synchronised blade overlap allows for an excellent turning circle and maneuverability, plus improved contour following in restricted areas.
- 100 mm wide kinked axe flails provide substantial impact and cutting power to handle prunings, while still giving the grass a clean, even finish - throwing to the side or rear.
- 'Triple-stack' mulcher blades on the GML have a central 100 x 10 upper and lower knife tips to provide finely chopped mulch material in all orchard/vineyard row conditions. These blades are double-edged and can be rotated for even wear and economical cutting life.
